**DESERTMICRO CHOOSES COLO5 FOR ITS COLOCATION  
AND DISASTER RECOVERY DATA CENTER**

JACKSONVILLE, Fla. (September 7, 2010) – DesertMicro, the Florida-based provider of leading-edge software solutions for waste management, recycling and logistics companies, announced that it selected Colo5 to provide colocation and network services for its IT infrastructure.

Headquartered in Jacksonville, Fla., Colo5's core infrastructure is rated to withstand hurricane category 5 forces to ensure maximum reliability and peace of mind. Colo5's data centers are designed to accommodate the changing bandwidth demands, power density and cooling needs of the colocation market.

"Colo5 will help us maintain our reliability goals and furthermore provide a higher level of security to our customers through its advanced safeguards," said Barry Grahek, CEO and president of DesertMicro. "We have great confidence in the Colo5 network team and look forward to growing our business with them in the future."

With more than 1,100 clients and customers who depend on information availability, it became increasingly important for DesertMicro to move its IT footprint to a facility that could offer high-tech power and network security and critical data protection services. Now, DesertMicro customers will receive a guarantee of uptime and network stability.

"Colo5 aims to deliver the highest quality data center services to businesses in the Southeast," said Doug Recker, Colo5 CEO. "We are excited to be a partner in DesertMicro's continued growth and success."

***About Colo5***

Colo5 is a leading independent data center operator offering secure and hardened colocation and data recovery services to customers nationwide. With more than 140,000 square feet of dedicated facilities, Colo5 provides state-of-the-art security, redundant power systems and a robust fiber network optimized for performance and speed to a host of demanding customers. For more information on Colo5's data center services, visit [www.colo5.com](http://www.colo5.com).

***About DesertMicro***

With more than 20 years of experience, DesertMicro offers high-level expertise in software application, developing comprehensive, integrated software products customized to meet companies' routing and accounting needs around the world. The "MANAGER" suite of fully integrated applications – RouteManager, RecycleManager, StreetManager, ScaleManager and TruckManager GPS and AVL tracking systems – was designed and built in-house and can be implemented together as a complete software solution or individually as needed.

DesertMicro's innovative developments continuously raise the bar for software solutions that are used to manage and increase productivity of businesses in the waste hauling and recycling industry.
