## **DESERTMICRO ANNOUNCES OPENING OF NEW SACRAMENTO OFFICE**

SACRAMENTO, Calif. (September 27, 2010) – [DesertMicro](http://DesertMicro.net), the Florida-based provider of leading-edge software solutions for waste management, recycling and logistics companies, is pleased to announce the opening of their new office in Sacramento. This new office will allow DesertMicro to improve service for existing and prospective customers in the West Coast region.

“Over the last few years, we have added a significant number of new customers in the Western U.S.,” said Barry Grahek, CEO and president of DesertMicro. “This market has positioned itself as an area that is attracting more and more business. It has long been our intention to establish a presence there, and we are proud to announce this next step toward executing our growth plan.”

With the increased capabilities that this office brings, DesertMicro will focus on building its brand and increasing its client base in the Western U.S. The staff at the new office is comprised of technical specialists and sales representatives who will be able to provide customer support in addition to DesertMicro’s headquarters in Jacksonville, Fla.

### ***About DesertMicro***

With more than 20 years of experience, DesertMicro offers high-level expertise in software application, developing comprehensive, integrated software products customized to meet companies’ routing and accounting needs around the world. The “MANAGER” suite of fully integrated applications – RouteManager, RecycleManager, StreetManager, HazMatManager, ScaleManager and TruckManager GPS and AVL tracking systems – was designed and built in-house and can be implemented together as a complete software solution or individually as needed.
