DESERTMICRO INTRODUCES HAZMATMANAGER FOR MANIFEST AND PROFILE TRACKING AND ASSET MANAGEMENT

JACKSONVILLE, Fla. (December 15, 2010) – [DesertMicro™](http://DesertMicro.com), the Florida-based provider of leading-edge software solutions for the solid and liquid waste recycling industries, announced the new release of HazmatManager, the solution for liquid waste recyclers to track collection, transportation and processing of hazardous waste materials.

HazmatManager was developed from the needs of the hazardous materials and waste transporters to manage hazardous and non-hazardous drum and bulk wastes. In addition to easing the regulatory burden of manifest and profile tracking, it also tracks multiple tests on each load and determines when to split the load between tanks. Furthermore, HazmatManager provides detailed customer history and comments, extensive billing options as well as truck route optimization.

“We are pleased to offer HazmatManager for office automation to the hazardous materials transportation industry,” said Barry Grahek, CEO and president of DesertMicro. “We continuously advance our products based on the needs of waste and recycling companies who are looking to eliminate inefficiencies through software and computer systems.”

With advanced barcode labeling and scanning options available, our HazmatManager customers can track every step of their process from collection to transportation and processing. Overall, HazmatManager provides a complete follow-through from service call to dispatch, profile approval, waste collection, asset management and processing.

About DesertMicro

With more than 20 years of experience, DesertMicro offers high-level expertise in software application, developing comprehensive, integrated software products

-more-

customized to meet companies' needs around the world. The "MANAGER" suite of fully integrated applications – RouteManager, RecycleManager, WebManager, StreetManager, ScaleManager, PocketManager and TruckManager GPS and AVL tracking systems – was designed and built in-house and can be implemented together as a complete software solution or individually as needed.

DesertMicro's innovative developments continuously raise the bar for software solutions that are used to manage and increase productivity of businesses in the waste hauling and recycling industry. For more information on DesertMicro, please visit www.desertmicro.net or call (800) 547-7082.
